

Independent research task – using super curriculum – PSYCHOLOGY – ready for transition into psychology 2022

1. Using two of the independent ideas from the app – you must use a different medium in each case – ie watch one ted talks and then use something else.
2. Complete the boxes below to show your process so you can access again, thinking about the skills you may have gained from this.
3. Summarise your two SC activities into either: a powerpoint presentation, summarisation sheet, mindmap, comic strip or any other way you can think to summarise what you have found out about. If you can link it to anything you may have learnt from the transition booklet then clearly make the link. **Ie if you have researched Zimardo’s Stanford prison experiment and then watched the film as part of the SC, then suggest EXPLICITLY how they might link.**

	Medium used – where/how etc.	What did I find out about?	What skills do you think this will give you?
1.			
2.			

To summarise you need to have

1. Completed the table to show your thought process and how you did it etc.
2. Completed a summarisation of some kind.

Link to the supercurricular App –

This needs to be handed in with your transition booklet on the first lesson.
